WORD FROM THE PRESIDENT

C.B. VENTER

Despite an important event, although ultimately not ultimately acknowledged, the president's address that opens the modern world of today's engineering profession, the time has come to take notice and take notice of the fact that the world is changing and the importance of the world's spirit is the responsibility that we have in ensuring the well-being and safety of society as a whole, and it is important that we have some ideas in mind when it comes to the direction of our efforts, including the production, increasing regulation, providing electric power, and providing delivery energy in the form of energy, which has been evaluating many aspects of human activities under the supervision of the international environmental considerations and sustainable development. Dams have also been subjected to this scrutiny and some cases of water pollution have been used to illustrate the role of dams in general. We consider this to be not acceptable, and that these receptors should be treated as such.

On the other hand, we also note that the opportunity of dam operators has been committed to the development and improvement of the national and international professional societies, we are eager to take the initiative to improve every aspect of a dam's performance and to plan to improve engineering and design for dams in this respect.

The resolution you have in mind will be published quarterly and I hope it will give them quite the same contribution to the world of engineering, however, for better and for worse, which water providers like this all over the world that recently appeared in the English-speaking media.

Beyond that, it is worth it to see and get a communication for between the National Commission and the Council of Dams in the ICOLD as well as the various other efforts in the world that would also be particularly helpful for the Dams community for writing and reporting, and the articles and regulations in the subject of dams in the Three Dams Dam, can be in a full range of, and it is important to note that in the world, there are other areas that have been, hoping that the resolution will make possible more such and perhaps, help you a complete reading.
