The Dams Newsletter

New possibilities for ICOLD

The new ICOLD has given the world a model of what is possible. The new dam owners and operators are using the latest technology, not only to build the dams but also to manage them. The new ICOLD will be able to do this through its new structure, through the use of modern technology and through its new governance structure.

The new ICOLD will be able to do this through its new structure, through the use of modern technology and through its new governance structure.
