Climate Change: Benefits of Dams & Reservoirs

By Robert May

The benefits of dams and reservoirs are often overlooked in the context of climate change. In the context of climate change, dams and reservoirs can provide a number of benefits, including water storage, flood control, and hydropower generation. These benefits can help to reduce greenhouse gas emissions and mitigate the impacts of climate change.

ICOLD Invites DA Damians to the 2011 World Dam Summit in Mexico

The International Commission on Large Dams (ICOLD) is pleased to announce that it will host the 2011 World Dam Summit in Mexico, from 15-19 October 2011. The summit will be held at the Intercontinental Hotel in Mexico City. The summit will focus on the theme of "Dams and Reservoirs in a Changing World". The summit will provide an opportunity for dam owners, operators, and stakeholders to share their experiences and discuss the challenges of dam and reservoir management in a changing world.

Energy Storage and Dam Construction

The ICOLD News Bulletin is pleased to announce that it will publish a special issue on "Energy Storage and Dam Construction". This issue will focus on the role of dams and reservoirs in energy storage and the challenges of dam and reservoir construction in a changing world. The issue will include articles on the design, construction, and operation of dams and reservoirs for energy storage.

ICOLD Activities

The ICOLD News Bulletin is pleased to announce that it will publish a special issue on "ICOLD Activities". This issue will focus on the activities of ICOLD and its member organizations. The issue will include articles on the work of ICOLD and its member organizations in the field of dam and reservoir management.
