Climate Change: Benefits of Dams & Reservoirs

By Robert May

The benefits of dams and reservoirs are often overlooked in the context of climate change. In the context of climate change, dams and reservoirs can provide a number of benefits, including water storage, flood control, and hydropower generation. Dams and reservoirs can also provide a number of other benefits, including water storage, flood control, and hydropower generation.

ICOLD Inaugures 21st National Conference on Dams, Mexico City, Mexico

ICOLD celebrated its 50th anniversary in Mexico City, Mexico, on May 10, 2011. The conference was held at the Convention Center of the National Palace and was attended by over 1,000 participants from 100 countries. The conference was organized by ICOLD and the Mexican Government.

ICOLD Celebrates 50th Anniversary

ICOLD celebrated its 50th anniversary on May 10, 2011. The organization was founded in 1961 and has since become a leading international organization in the field of dams and reservoirs. ICOLD has a membership of over 100 countries and has been instrumental in the development of many major dams and reservoirs around the world.

News about Dams

Energy Storage and Dams in Brazil

The Brazilian government has announced a plan to build a series of dams and reservoirs to provide energy storage. The plan is part of a larger program to develop the country's hydropower potential. The dams and reservoirs will be used to store water during periods of high flow and release it during periods of low flow, providing a steady supply of electricity.

ICOLD Activities

ICOLD has a number of activities planned for the coming year. These include the 21st National Conference on Dams in Mexico City, the International Day of the Girl, and the 50th Anniversary of ICOLD. ICOLD also has a number of other activities, including the Dam Safety Program and the Dams and Reservoirs Program.
