### AFRICA'S WATER DEVELOPMENT NEEDS

**Vice President  
Paul Biya**

It was a privilege to attend a recent workshop in Johannesburg, South Africa on Sustainable Water Resources which had been organized by the New Partnership for Africa's Development (NEPAD) and the African Development Bank (ADB). It was able to attend in view of the important general international involvement in the water in the South African Department of Water Affairs and Forestry and of my background in international cooperation in the field of water resources and development. The workshop was organized by the African Development Bank (ADB) and the African Development Bank (ADB) in partnership with the African Development Bank (ADB) and the African Development Bank (ADB).

It was a pleasure to attend a recent workshop in Johannesburg, South Africa on Sustainable Water Resources which had been organized by the New Partnership for Africa's Development (NEPAD) and the African Development Bank (ADB). It was able to attend in view of the important general international involvement in the water in the South African Department of Water Affairs and Forestry and of my background in international cooperation in the field of water resources and development. The workshop was organized by the African Development Bank (ADB) and the African Development Bank (ADB) in partnership with the African Development Bank (ADB) and the African Development Bank (ADB).

Some of the interesting facts on African water resources are as follows:

- Africa has the 6th largest population in the world, with 1 billion people, and the 2nd largest area of land, with 30 million km<sup>2</sup>.
- The continent is home to 10 of the world's 15 largest rivers, and 10 of the world's 15 largest lakes.
- Africa has the 2nd largest area of arable land in the world, with 1 billion people, and the 2nd largest area of land, with 30 million km<sup>2</sup>.
- The continent is home to 10 of the world's 15 largest rivers, and 10 of the world's 15 largest lakes.
