ICOLD ON THE FRONT LINE FOR DEVELOPMENT

Achieving the 2015 millennium goals is the greatest challenge we face. It has resulted in the Millennium Development Goals (MDGs) to be adopted by 191 UN member states. ICOLD has been active in being able to improve water and food security, but there are still many challenges, and there are opportunities to work with other agencies to help achieve them.

The case of Asia is well known. Twenty per cent of the population live in slums, with extreme consequences. The Ganges, the Chao Phraya, the Mekong, and the Flycatcher. This situation can be seen in the map. 70% of the hydroelectric potential is concentrated in the mountains. Available to only a few million people.

Lata Bajaj
President, ICOLD

Meeting the world's water and electricity problems is a multifaceted issue, and it requires a combination of financial, technical, human, political, and social resources. All these are generally made available from the regional, national, and international banks and countries (large, medium and small) and are not always available in the same way. It is important to have a common approach to the problem, and to have a common approach to the problem, and to have a common approach to the problem.

Michel De Vivo
Secretary General, ICOLD

It is therefore the duty and mission of ICOLD to promote and develop water and hydroelectricity in the developing world. After being the primary ICOLD and in 1998 National Commission on water, human, political, and social resources. ICOLD is a global organization, with more than 100 member states and agencies in the field of dams. There are also 13 National Commissions, in which approximately 100 agencies participate, supported by the knowledge base of the 100 countries. ICOLD is a global organization, with more than 100 member states and agencies in the field of dams. There are also 13 National Commissions, in which approximately 100 agencies participate, supported by the knowledge base of the 100 countries. ICOLD is a global organization, with more than 100 member states and agencies in the field of dams. There are also 13 National Commissions, in which approximately 100 agencies participate, supported by the knowledge base of the 100 countries.

ICOLD should be able to assist member states in accomplishing their mission. This is why we are working together to improve ICOLD's activities and to provide technical assistance to member states. ICOLD is a global organization, with more than 100 member states and agencies in the field of dams. There are also 13 National Commissions, in which approximately 100 agencies participate, supported by the knowledge base of the 100 countries.
