

Hydrovision Brazil, September 20-22, 2011, Rio de Janeiro (Brazil)

What Makes HydroVision Brazil Different?

HydroVision Brazil is designed specifically for individuals working within the utility and private power sectors, as well as engineering and commercial personnel from the equipment manufacturing and consulting fields. The event features content directly relevant to the day-to-day operations of the hydroelectric industry, focusing on solutions and practical approaches to timely issues and challenges.

Who Will You Meet?

HydroVision Brazil will attract attendees and exhibitors from the following areas:

- ▶ Generators
- ▶ Turbines
- ▶ Electrical and mechanical components
- ▶ Controls and automation
- ▶ Engineering and design
- ▶ Consultation
- ▶ Financial advisement
- ▶ Construction services
- ▶ Insurance and risk management
- ▶ Research and development
- ▶ Environmental impact
- ▶ Safety and construction

What Will You Learn?

In three days, you'll learn the latest on:

- ▶ Environmental protection and management
- ▶ New hydro energy production
- ▶ Public education
- ▶ Public relations
- ▶ Regulatory issues
- ▶ Risk management
- ▶ Small and medium hydro energy

- ▶ Social issues
- ▶ Transmission grid issues, including grid integration
- ▶ And more

Make plans now to attend this premier event and connect with hundreds of colleagues and qualified buyers involved in the advancement and future of hydroelectric power in Latin America.
